edward-li-portfolio.vercel.app/

Currently pursuing a Master of Engineering Leadership at UBC and a Software Engineering program at BrainStation. I have 2 years of experience as a project manager in the AI industry. Experienced in full-cycle project management and delivering exceptional user experiences across diverse projects. I am dedicated to developing enterprise-grade, high-performance applications by writing maintainable and high-quality code.

EDUCATION

University of British Columbia

Master of Engineering Leadership, High-performance Building | GPA: 4.2/4.33

Vancouver, BC

Jan, 2024 - Dec, 2024

BrainStation

Software Engineering Diploma

Vancouver, BC

Jun, 2024 - Jan, 2025

Tianjin University

Bachelor of Engineering, Civil Engineering

Tianjin, China

Sep, 2013 - Jul, 2017

PROJECTS

Fullstack E-Commerce Platform | Next.js, Node.js, Express, MongoDB

Sep, 2024 - Nov, 2024

- Develop the interactive and responsive frontend web with **Next.js** framework, leveraging **HTML**, **Tailwind** and **TypeScript**
- Utilize **Node.js** to build a **RESTful API** service to provide data for the platform
- Implement a **MongoDB** to store users, products and platform data, and a **Redis** cache to store users' cookie
- Leverage libraries to achieve complex functions, such as **Cloudinary**, **Stripe**
- Deployed the frontend on **Vercel**, visit: <https://eunnikoo.vercel.app/>, and backend on **Render**

Banking Platform | Next.js, Appwrite, Plaid, Dwolla

Jun, 2024 - Aug, 2024

- Developed a responsive banking application using the **Next.js** framework, enabling unified management and transaction operations across multiple bank accounts
- Utilized **Plaid** API to integrate and manage multi-platform bank accounts, implemented transaction functionality using **Dwolla**
- Employed **Appwrite** to build a RESTful API service, including server and database
- Deployed the website on **Vercel** for public visit

EXPERIENCE

4Paradigm

Technical Project Manager

Beijing, China

Jan, 2022 - Dec, 2022

- Managed project delivery of the B2B AI platform product. Created and delivered solutions for clients based on their needs leveraging the AI platform.
- Tracked the customer's experience throughout the entire process and provided the help and solutions they needed. Provided optimization suggestions for product design and delivery processes based on customer feedback.
- Managed technical and non-technical documentation for products and deliverables, ensuring that the company's teams and clients' teams could find the technical guidance and usage guides they need from the documentation.

Meituan, Autonomous Driving Team

Project Management Office (PMO)

Beijing, China

Dec, 2022 - Jul, 2023

- Established and optimized the R&D process for the autonomous driving team, improving the system suitable for AI and autonomous driving based on agile methods, resulting in increased efficiency and reduced costs for a team of over 500 members.
- Managed the development of more than 10 new versions of autonomous driving software, understanding the primary challenges encountered during the R&D process, and continuously optimizing the development mechanism.

SKILLS

Programming Language: JavaScript (TypeScript), Java, Python

Language: English, Mandarin

Technology: React.js, Next.js, Node.js, Express, Redux, MySQL, MongoDB, Redis, HTML, CSS, Sass, Tailwind, UI Libraries

Tools: Git, Babel, Vite, VSCode, WebStorm, JIRA, Agile Method
